Application/Control Number: 09/787,339

Art Unit: 2655

Election/Restriction

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- A. Claims 1-1 and 27 are drawn to an apparatus of an optical recording medium having a sector structure including addresses, classified in Class 369, subclass 275.1.
- B. Claims 12-18 and 28 are drawn to a method of recording stereo signals on a record carrier, classified in Class 369, subclass 59.25.
- C. Claims 19-26 and 29 are drawn to an apparatus for reproducing a stereo signal from a record carrier, classified in Class 369, subclass 47.16.

Inventions A and B are related as product and method of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed can be used in a materially different method such as with method of recording video signals or magnetic signals of data. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Inventions A and C are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the apparatus does not require an apparatus for reproducing a stereo signal and a data signal from a record carrier.

Application/Control Number: 09/787,339

Art Unit: 2655

The subcombination has separate utility such as with a reproducing apparatus such as tape or magnetic recording. Because these inventions are distinct for the reasons given above and the search required for Group A is not required for Group C, restriction for examination purposes as indicated is proper.

Inventions B and C are related as two totally different subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, both subcombination as claimed does not require the particulars of the other subcombination as claimed at all because both them are separate subcombinations. The both subcombinations has separate utility. Because these inventions are distinct for the reasons given above and the search required for Group B is not required for Group C, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

2. In addition, the Applicants are also required <u>elect a single species</u> from whichever of the above three groups they elect. For group A, B or C

This groups contains claims directed to the following patentably distinct species of the claimed invention:

The optical recording/reproducing medium of:

- a) fig. 1-2, 3-4 [first embodiment];
- b) fig. 1-2, 5-6 [second embodiment].

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are considered generic.

Application/Control Number: 09/787,339

Art Unit: 2655

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. A telephone call was made to Mr. James Leimbach on August 17, 2004; to request an oral election to the above restriction requirement, but did not result in an election being made. Mr. Leimbach said he does not have file and directed the Examiner to Mr. Mike Belk.

NOTE: Mr. Belk requested that a formal restriction be sent out for examination of the client.

4. Applicant is reminded that **upon the cancellation of claims to a non-elected invention, the inventorship must be amended** in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be

'Application/Control Number: 09/787,339

Art Unit: 2655

accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

NOTES/REMARKS

- 5. The Applicants are urged to examine the claims in its present form. Some of the claims may present problems of hybrid claims. For example method claims containing apparatus or a product etc.
- 6. A shortened statutory period for response to this action is set to expire 1 (one) months and 0 (zero) days from the mail date of this letter. Failure to respond within the period for response will result in ABANDONMENT of the application (see 35 U.S.C. 133, M.P.E.P. 710.02, 710.02(b)).

Contact information

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gautam R. Patel whose telephone number is (703) 308-7940. The examiner can normally be reached on Monday through Thursday from 7:30 to 6.

The appropriate fax number for the organization (Group 2650) where this application or proceeding is assigned is (703) 872-9314.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ms. Doris To can be reached on (703) 305-4827.

Any inquiry of a general nature or relating to the status of this application should be directed to the group receptionist whose telephone number is (703) 305-4700 or the group Customer Service section whose telephone number is (703) 306-0377.
